APHL™ SUSTAINING MEMBER

Through the power of Illumina® technology, you can now distinguish the genetic makeup of organisms more efficiently and with higher discovery power compared to traditional methods. Our NGS systems are enabling scientists to examine microbial and biological function, to track genetic changes, to rapidly respond to outbreaks, to monitor food sources, and much more.

Illumina is excited to offer our innovative technology in an effort to support the transformation of human health. Together with APHL, we are proud to offer a MiSeq® Starter Bundle for its members.

From now until the end of 2015, eligible participants* can purchase the MiSeq Starter Bundle for **14% off list price.**

The MiSeq Starter Bundle includes:

- MiSeq Desktop Sequencer (quantity 1)
- Nextera XT DNA Sample Prep kit (quantity 2)
- Nextera XT Index Kit (quantity 1)
- MiSeq Reagent Kit v2 500 cycles (quantity 3)
- Training: Nextera XT DNA Sample Prep (quantity 1)
- Comprehensive Service Plan (1 additional year)

Learn more about the focused power of MiSeq Sequencing Systems at **www.illumina.com/miseq** and contact a sales representative for details about the MiSeq Starter Bundle Promotion.

Promo code: MSQBUN_XT

** Promotion valid for new to Illumina next-generation sequencing laboratories. For Research Use Only. Not for use in diagnostic procedures.*
