INTRODUCTION

This is the 13th Edition of the Consolidated Annual Report (CAR) on State and Public Health Laboratories. The purpose of the CAR is to provide data for planning, management, and evaluation to the members of the Association of State and Territorial Public Health Laboratory Directors (ASTPHLD). At the annual ASTPHLD meeting held in Mobile in April 1975, the Association voted to emphasize three areas of reporting: Personnel, Finances, and Diagnostic Workload. This report contains data on these three areas and on three additional topics concerning organizational changes, screening programs, and branch laboratories. This edition, CAR - FY 76, contains data from 53 of the 54 members of ASTPHLD. The Virgin Islands is the only member of the organization which did not report.

This CAR contains several major changes from previous issues. These changes are a result of a three year study of the CAR conducted by an ad hoc committee of the ASTPHLD and several members of the Laboratory Management Consultation Office, Center for Disease Control.

The changes generally have occurred in the workload reporting section. The addition of (1) Laboratory Improvement Programs, (2) Biologics, Reagents, and Media Produced for Distribution, and (3) Research and Development has expanded the workload reporting categories from 12 to 15. Reporting the number of examinations which are conducted has been dropped. The workload reporting section of CAR - FY 76 now contains the number of specimens by category and sub-category and the type of testing which is routinely performed by the laboratory.

The major change in the Personnel area is the reporting of Professional and Technical positions by workload category, thus providing an indication of the emphasis within each of the participating laboratories. The Finance section remains about the same as last year, except that data on "Grants and Contracts" and "Fees for Services" are now a routine part of this section rather than special tables under miscellaneous.

There are several special instructions which the reader of this report should be aware of. First, a "-" inserted in a reporting column indicates that a state reported no activity, for that particular item. An "X" indicates a yes response, or that the laboratory does provide this service. In some of the tables the data which is being reported is not an activity of all of the member laboratories. In these instances, the states with no activity are either deleted from the table or the appropriate column is "blank". The reader is reminded that the data contained in this report is provided only by the members of ASTPHLD. The information which they provide is generally limited to the organizations for which they have direct responsibility. Thus, a "no activity" indication for a state means "no activity" for that reporting organization only. In actuality, other state organizations may be quite active, but the data is not available for this report.

Second, many of the tables have averages and totals or other statistical analyses. Because of rounding error and population estimates, the analyses may not sum to precisely the expected results.

The third item to be aware of is the use of footnotes to indicate any unusual circumstance relating to an entry in a table. These footnotes are referred to in the tables by (a, b, c, etc.) and are found at the end of each table.

Generally, the term "specimen" indicates an animal or human source and "sample" indicates an environmental source. However, in tables 1-14 through 1-17 the term "specimens" refers to both human sources and environmental samples.

There is one more topic which deserves a brief discussion in this introduction to the CAR - FY 76. Each reader should exercise caution when making comparisons between states. Every attempt has been made to insure the correctness of the raw data which is included in this report. However, in many instances, the operating mechanisms of a given state can be of such a nature that a false impression of that state's activity is implied to the reader. For example, State A may have a budgetary system whereby administrative overhead, heating and cooling, and operation of branch laboratories are included in its budget. State B may have a system whereby only direct operational costs are included in the laboratory's budget. Thus, the casual reader of this report would conclude that State A expends more money than State B. Actually, State B could have more, less than, or the same amount of funds as State A, depending upon the amount of "hidden expenditures" not reported for State B.

The same caution should be applied to the indices and rankings which are contained in some of the summary tables. These summary tables are reduced to a common denominator in an attempt to equalize the large variation in population, size of the laboratory, etc. However, a high per capita index does not necessarily indicate high salaries, nor does it indicate lack of efficiency. In order to be able to put a value judgment of "good" or "bad" on such an indicator you would first have to know a great deal more about the details of what goes on in a state's program.

Thus, we suggest that if you wish to make state to state comparisons, you should (1) study the detailed information from the tables on each of the states in the comparison to ascertain similarities and differences, and (2) contact the individual State Laboratory Directors to determine the reasons for the differences.

*Expressed as full-time positions.

A = Six positions transferred at end of FY 1976 to State Department of General Service, who now have responsibility for building maintenance.

B = Includes fifteen (15) positions assigned to Regional Laboratories on special projects.

Definitions

1. Management: Include laboratory directors and assistant directors, lab supervisors, business managers, management officers and administrative officers who spend more than 50% of their time on administration and management of laboratory activities.

2. Clerical: Include secretaries, typists, and clerks in the office of the director, office services staff, budget and fiscal clerks and others. Do not include those covered in supportive services categories.

3. Professional and Technical: Those primarily engaged in examining and testing specimens and samples, or in a laboratory improvement program; including bacteriologists, chemists, microbiologists, medical technicians and technologists, and those laboratory assistants and laboratory helpers who contribute directly to the performance of laboratory tests or work in laboratory improvement programs.

4. Supportive Services: All those except maintenance personnel not included in the first three categories. Examples are those engaged in preparation of glassware, media, shipping containers, animal handling work, messengers, and supply and procurement personnel.

5. Maintenance: Include those who install, repair, or perform preventive maintenance on equipment and maintenance of buildings including housekeeping.

C = Includes six (6) Project Funded Positions

D = Includes eighty (80) Project Funded Positions

TABLE 3-1 FOOTNOTES

A No breakdown available.

B Not included in laboratory budget.

C Figures not available.

D Includes Department-wide Support Services (indirect cost).

E Rate 22.7%.

F Does not include rent and utilities.

G This figure represents expenditures for Bureau of Microbiological Science only.

H Not in budget.

I For Federal Salaries only.

J Purchase of Biologicals for Vaccination Program.

K For Salaries on Fee Monies only.

L Includes $184,733 for a contract with the University of Tennessee to provide toxicological analyses.

M Included in Supplies and Material category.

N Chose not to include this data in the report.

O Includes $99,000 for temporary help.

P Not in budget (22% - supplemental).

TABLE 3-1. DEFINITIONS

1. Personnel (Salaries and Benefits)

   Include all salaries and personnel benefits for all budgeted personnel.

2. Supplies and Material

   Include all supply and material expenditures for the laboratory.

3. Equipment

   Include all equipment costs--such as equipment purchased, rented, or maintenance and repair costs on equipment. Also include office and lab furniture.

4. General Operating Expenditures

   Include rent, all utilities, communication, building maintenance, postage, and housekeeping

5. Other

   Include intrastate travel, out-of-state travel, and special expenditures, i.e., renovation and remodeling costs, consulting fees, etc.

6. Total Laboratory Expenditures

   Total of 1-5, above.

TABLE 3-2 SOURCES OF LABORATORY FUNDS

	Total Laboratory Budget	STATE FUNDS Amount	STATE FUNDS % of Total Exp.	FEDERAL FUNDS Amount	FEDERAL FUNDS % of Total Exp.	EARNED FUNDS Amount	EARNED FUNDS % of Total Exp.	OTHER FUNDS Amount	OTHER FUNDS % of Total Exp.

TABLE 3-4. STATES REPORTING CHARGES FOR LABORATORY SERVICES

State	Services Performed	Charge Per Unit	Estimated Annual Receipts	Disposition of Funds
Me.	Water analysis(Bact.& Chem.) Serological screening Throat cultures Enteric Mycology, Parasitology Chemistry - Toxicology Pesticide analyses	$5,12,& 20 4.00 2.00 6.00 6.00 10.00/hr. 10.00/hr.	$219,839.00	To support activities not State or Federally funded - personnel, supplies, equipment, travel, personal programs.
Mass.	Certificate fee for labs approved by Laboratory Approval Program	5.00/ certificate	1,455.00	The general funds of the Commonwealth.
N.Y.	Blood lead and EP Lead in paint	6.85/ sample for both 2.00/samp.	100,000.00	Funds provide support for Lead Program
N.J.	7/1/76 - VDRL Rubella screening Bact. Exam. - Potable water 10/1/76 - Blood lead	2.00/spec. 3.00/spec. 6.00/spec. 6.00/spec.	-	Division of Laboratories and Epidemiology's Revolving Fund.
Ind.	Premarital serologies Private water testing Public water testing	2.50 4.00/test 10.00/yr.	32,779.50	All goes to State general funds except $4,674 (handling fee). Water sample funds remain in a revolving fund for postage for private well water samples.
Wisc.	Rabies Water bacteriology All other tests	1.00/spec. 1.00/spec. 1.50/spec.	663,000.00	Salaries, supplies, equipment, travel, training,etc.
Iowa	Bacteriological-MPN-Pvt. & Muni. water Nitrates, iron, hardness - Pvt. water Fecal coliform Trace metals Cations Anions Radiation Pesticides Many other chemical parameters	3.00 3.00 12.00 10-14.00 10.00/ea. 8 or 16.00/ea. 10-40.00 48-104.00 4-48.00	361,000.00	Estimate is included in general operating budget.
Neb.	Private water samples - Bact. & Chem. tests Agric. or Ind. water samples - Bact. & Chem. tests Blood or Breath Alcohol - quantitative test Body fluid drug screening test Provision of certain shipping outfits or specimen containers	2-15.00 5-20.00 8.00 5.00 1-3.00	15,000.00	Placed in dedicated fund. Appropriated to Laboratory annually by Legislature.

TABLE 3-4. STATES REPORTING CHARGES FOR LABORATORY SERVICES
(Continued)

State	Services Performed	Charge Per Unit	Estimated Annual Receipts	Disposition of Funds
Kans.	Water bacteriology	2.00/samp.	$ 96,999.80	To State's general revenue funds.
	Water chemistry - partial	7.50/samp.		
	Water chemistry - complete	23.00/samp.		
	Ground water analysis (fee based on # people served by water supply)	35-325.00/ annual fee		
	Surface water analysis (fee based on # people served by water supply)	135-800.00/ annual fee		
Md.	Expected in 1978			
N.C.	Bact. analysis - Pvt. water	5.00	237,685.00	State appropriation to Lab is reduced by the amount of estimated receipts and in effect becomes part of annual operating budget.
	Chem. analysis - Pvt. water	5.00		
	Examination of Pub. water supplies	15-64.00/yr Amt. depends upon gross sales or # of connections.		
	Sale of specimen collection outfits and biologicals	Varies with type.		
S.C.	STS	1.00	82,621.00	Support Laboratory activities.
	Rh Factor	2.00		
	Rubella	2.00		
	Febrile agglutination	3.00		
	FTA-ABS	3.00		
	Infectious Mono	3.00		
	Toxoplasmosis	3.00		
	Drug - Qualitative	3.00		
	Drug - Quantitative	8.00		
Fla.	Urine screening for dangerous drugs	2.00/spec.	10,742.00	Partial payment of expenses required for urine screening program.
	(If qualitative test for alcohol included with above)	0.50/spec.		
Ala.	Medicaid: 1. Pinworm	1.25	170,000.00	Into Health Department for chosen dispersion.
	2. Intestinal Parasite	3.58		
	3. Sickle Cell	2.75		
	Lead Detection	3.50		
Miss.	Medicare-Medicaid Patients	Medicaid Rate	105,000.00	General Laboratory budget.
	Throat culture for Group A Strep	1.00		
Ark.	Premarital blood test	1.00	19-20,000.00	Pay off bonds on building.
Mont.	Water bacteriology	4.00	Water Bact. 28,278.00	Water bacteriology - deposited to State General Fund.
	MPN	10.00		
	Fecal coliform	6.00		
	STD Chemical - water	15.00		
	EPA - STD Chemical - water	70.00		
	Individual chemicals	2.00	Abused Substances 5,000.00	Credited to budget.
	Drug screen - urine	6.00		
	Alcohol - blood & urine	6.00		
	Other Environmental - chemical analyses (air quality and water quality, etc.)	fee depends upon sample and test.	Chem. Lab. 5,500.00	Credited to budget. Funds received for analytical services go into Air Quality & Water Quality Bureau's budget. They pay costs to operate their respective sections of the laboratory.

TABLE 3-4. STATES REPORTING CHARGES FOR LABORATORY SERVICES
(Continued)

State	Services Performed	Charge Per Unit	Estimated Annual Receipts	Disposition of Funds
Ida.	Water Bacteriology tests	Fee depends upon # of test per mo.	$ 56,000.00	Included as part of operating budget (salaries & other expendable items).
	Water chemistry tests	"		
	Mercury, lead: tissues, urine, blood, foods, etc.	10.00		
	Cholinesterase enzyme assay	10.00		
	Urine drug screen	5.00		
	Syphilis serology	4.00		
	Rubella serology	4.00		
	Cytogenetic analysis	30.00		
	Food analysis - salmonella	8.50		
	Food analysis - coliform	6.00		
N.M.	All services performed for federal agencies, contractors, or grantees or State Agencies outside HSSD are charged for services received per sample relative value unit (adapted from ASTPHLD-CDC Relative Value Structure).	2.61/ Relative Value Unit	180,000.00	Receipts now to be part of budgeted operating revenue.
Ariz.	Immunology Clinical Microbiology Environmental Health	Various fees	120,000.00	To the State General Fund.- does not come back to support lab services.
Colo.	Urinalysis for drugs of abuse (rate based upon previous year's utilization by methadone maintenance clinics).	1.25/spec.	66,610	Appropriated as a Cash Fund by Legislature for salaries or personnel doing the work.
Wash.	Water chemistry tests (individual tests - complete analyses)	fee depends upon test requested	75-85,000.00	State General Fund.
Ore.	1. Metabolic Disorders	2.00/spec.	37,048.00	1. Used to fund Metabolic Disorders Program.
	2. Water Bacteriology - Federal Agency samples	2.00/samp.		2. Goes into Miscellaneous Receipts.

SECTION IV

WORKLOAD REPORTING CATEGORIES

SECTION IV

WORKLOAD REPORTING CATEGORIES

Workload Reporting is divided into the 15 Categories and Sub-Categories listed below:

I. Diagnostic Bacteriology
   A. Nasopharyngeal Specimens
   B. Mycobacteria Specimens
   C. Enteric Specimens
   D. Gonococcus Specimens
   E. Other Bacteriology Specimens

II. Mycology

III. Parasitology
   A. Intestinal Specimens
   B. Other Parasitology Specimens

IV. Virology
   A. Rabies Specimens
   B. Viral Isolation Specimens

V. Immunology
   A. Syphilis Serology Specimens
   B. Bacterial Serology Specimens
   C. Fungal Serology Specimens
   D. Parasitological Serology Specimens
   E. Viral & Rickettsial Serology Specimens
   F. Other Serology Specimens

VI. Hematology
   A. Hematology Specimens
   B. Immunohematology Specimens
   C. Hemoglobinopathy Specimens

VII. Clinical Chemistry
   A. Clinical Chemistry Specimens
   B. Urinalysis Specimens
   C. Inborn Errors of Metabolism Specimens
   D. Multiphasic Screening Specimens
   E. Other Clinical Chemistry Specimens

VIII. Pathology
   A. Exfoliative Cytology Specimens
   B. Cytogenetics Specimens
   C. Other Specimens

IX. Environmental Microbiology
   A. Water Samples
   B. Dairy Product Samples
   C. Food & Beverage Samples
   D. Other Samples

X. Environmental Chemistry
   A. Water Samples
   B. Dairy Products and Food Samples
   C. Pesticide Samples
   D. Air Pollution Samples
   E. Radiological Analysis
   F. Other Samples

XI. Occupational Health and Safety
   A. Environmental Samples
   B. Biological Samples

XII. Toxicology
   A. Physical Samples
   B. Biological Samples

XIII. Laboratory Improvement Program
   A. Clinical Laboratories
   B. Dairy/Food Laboratories
   C. Water Laboratories
   D. Other

XIV. Biologics, Reagents, and Media Produced for Distribution
   A. Biologics
   B. Reagents
   C. Media

XV. Research and Development
   A. Basic Research
   B. Applied Research
   C. Technical Development

DIAGNOSTIC WORKLOAD SECTION

THE FOLLOWING DEFINITIONS APPLY TO CATEGORIES I THROUGH XII:

Workload is reported by the number of specimens in each category or sub-category. Types of procedures routinely* used in your laboratory are to be indicated by checking the appropriate box. The Association (ASTPHLD) is interested in the type of procedures routinely followed in your laboratory. Therefore, do not check those procedures that you have the capability of performing but do not do so on a routine basis.

*Definition of Routine - Those tests performed as part of your standard operating procedures on a specimen or sample.

Specimen/Sample

Any material received in the lab for testing in a workload category or sub-category or a material which is divided into aliquots for testing in multiple categories or sub-categories is counted as one specimen for each category or sub-category. Specimens collected from the same site on the same patient (or same environmental source) at the same time, are to be counted as one specimen in each category or sub-category in which it is tested.

TABLE 4-1.

TABLE 4-8.

E. Other Bacteriology Specimens

	# of Specimens	Disease - Procedures Used
Me.	737	Anaerobiosis, food poisoning, pneumonia - smear, culture, biochemicals; reference cultures - smear, culture, biochemicals, factors, grouping; meningitis - smear, culture, biochemicals; serogrouping; influenza (bact.) smear, culture, biochemicals, factors, grouping.
N.H.	1,576	Miscellaneous specimens - smear, culture, biochemicals for bacterial identification.
Vt.	144	Miscellaneous - smear, culture, biochemicals.
Mass.	1,246	Bacteremia - culture; bacterial infections - biochemical; meningitis - serogrouping; nosocomial infections - serotyping.
Conn.	12,456	Trichomonas/candida - microscopic; septicemias - blood culture; miscellaneous infections - culture; nosocomial - staph phage; Vincent's - microscopic; leptospirosis - culture.
N.Y.	4,870	Staph - coagulase, phage typing.
Pa.	403	Food poisoning, environmental and body material related to food poisoning - culture, biochemicals.
Ohio	4,061	Mycoplasmosis - culture miscellaneous, antibiotic sensitivity; leptospirosis culture miscellaneous, culture identification (referred).
Ind.	911	Miscellaneous cultures for identification - anaerobic, aerobic.
Ill.	3,642	Food poisoning - culture, biochemicals, phage, animal inoculation, serotyping; leptospirosis - culture; meningitis - culture, biochemicals, serotyping; atypical pneumonia - mycoplasma culture; Vincent's angina - smear; staph outbreaks - phage typing; syphilis - darkfield, stained smear; anaerobic and miscellaneous infections - culture, biochemicals, gas chromatography, animal inoculation.
Mich.	25,966	Bacteremia - blood culture; miscellaneous infections - culture and antibiotic sensitivity; dental caries - saliva culture for lactobacilli; urinary infections - culture and antibiotic sensitivity; staph disease - phage typing.
Wisc.	15	Vincent's - smear.
Minn.	217	Brucella - culture; botulism - culture, toxin test; Vincent's angina - smear; blood, CSF, tissues - aerobic and anaerobic cultures.
Ia.	2,165	Miscellaneous wounds, fluids, reference cultures - direct plating biochemicals, serotyping, serogrouping, FA.
Mo.	982	Miscellaneous reference cultures from a variety of diseases or conditions - microscopic, biochemical, serological tests.
N.D.	10,872	Wounds, urine and miscellaneous specimens.
S.D.	1,686	Wounds, ears, urines, superficial or deep infections - culture, biochemical sensitivities.
Nebr.	1,224	Miscellaneous as appropriate (includes referred specimens).
Kans.	2,940	Staph infections - culture, coagulase, phage typing (23); food bacteria/food poisoning, anaerobic infections, meningitis - culture, enrichment plating, biochemicals, serogrouping, serotyping, plate counts; bacterial pneumonias, blood cultures - smear, culture, biochemicals, mice toxogenicity tests (wher necessary); other miscellaneous infections - smear, culture, biochemicals, serogrouping, serotyping, antibiotic sensitivities (when requested).

TABLE 4-8.
(Continued)

E. Other Bacteriology Specimens

	# of Specimens	Disease - Procedures Used
Del.	892	Pathogens - primary plating, enrichment plating and biochemicals.
Md.	27,029	Genito-urinary, wounds, blood and spinal fluid - cultures.
Va.	4,008	Autopsy and anaerobic specimens - wound, urine, blood and other miscellaneous cultures.
N.C.	2,038	Anaerobes - culture, biochemistry, GLC analysis; reference identification - culture, biochemistry, serotyping.
S.C.	4,806	Sputum, spinal fluid, miscellaneous drug sensitivity, blood culture, urine, vaginal, urethra, skin, ear, eye - biochemical, serological.
Ga.	4,364	Bacteremia - smears; meningitis - cultures; osteomyelitis - biochemical; pulmonary diseases - serologic.
Fla.	3,964	Miscellaneous (septicemias, CNS disease, eye, ear, mouth, etc.) - infectious culture and/or smears.
Ky.	1,817	Anaerobes - smear, biochemicals; staph bacteriophage - gram stain, coagulase, phage typing; miscellaneous cultures - smear, biochemicals, coagulase and serogrouping.
Tenn.	2,981	Identification of any bacterial isolate of probable clinical significance - smear, culture, biochemical, serogrouping, serotyping; Staph. aureus - phage typing.
Ala.	4,123	H. ducreyi - culture; N. meningitidis - culture; pathogenic E. coli - FA; brucella, staph, Koch-Weeks bacilli, Vincent's - culture, smear, biochemical, serotyping, animal inoculation.
Miss.	2,649	Salmonella in water - primary and enrichment plating, biochemical, serogrouping, serotyping, subculture; miscellaneous cultures - primary and enrichment plating, biochemical, subculture; blood cultures - primary and enrichment plating, culture, biochemical; urine cultures - primary and enrichment plating, bacterial sensitivity testing, biochemical, subculture.
La.	5	Vincent's angina - smear.
Okla.	543	Urinary tract infections - culture; meningitis, bacteremia, cultures for identification - culture, serology; selected cases - antibiotic sensitivity.
Ida.	1,895	Anaerobes - culture and gas chromatography; miscellaneous (ear, eye, wounds) - culture; referral - culture; drug susceptibility - culture.
Colo.	423	Reference specimens (various) - culture, microscopic and biochemicals.
N.M.	4,961	Miscellaneous communicable diseases - smear, plating, biochemicals, sensitivity testing, serotyping, FA.
Ariz.	1,158	Anaerobe bacteriology, miscellaneous bacteriology - culture, isolation biopsy identification.
Utah	155	Identification of isolates from miscellaneous sources - cultural procedures as appropriate.
Nev.	391	Miscellaneous (urine, pus) - culture.
Wash.	724	Reference cultures for identification of aerobes and anaerobes - all bacteria culturing medias and procedures as needed to identify and determine antibiotic sensitivity as needed.

TABLE 4-8
(Continued)

E. Other Bacteriology Specimens

	# of Specimens	Disease - Procedures Used
Ore.	643	Miscellaneous specimens for culture or identification.
Calif.	1,259	Plague - culture, animal inoculation, bacteriophage; miscellaneous aerobic and anaerobic bacteria - culture, FA, serology, GLC, animal inoculation; Aerobic, anaerobic cultures, and relapsing fever - stained smears, animal inoculation.
Hawaii	6,025	Leptospirosis - culture; Staph. - phage typing; antibiotic sensitivity; anaerobic.
Guam	360	Cervical, skin, eye, wound, ear, urine - no procedures listed.
P.R.	10,856	Pyelonephritis, otitis, abcess - ulcers wounds, culture - biochemicals - serology.
Total	164,182	
Average	3,731

*Figures reported for professional and technical budgeted positions only. An asterisk by an entry indicates that a state reported more personnel than indicated in the professional and technical budgeted positions for this area. This inconsistency resulted from a confusion in the way the data was requested. Future editions will contain total personnel working in this area.

**The numbers listed for registered, approved, and licensed laboratories may not reflect the total number of laboratories for each state. In the next edition we will further define these terms thus improving the accuracy of data in this area.

(a) Additional 7 positions in Dairy and Water LIP.

(b) Lab Certification Unit part of Dept. of Health and Social Services (18 positions).

(c) Handled by Office of State Planning and Development.

(d) Part of Epidemiology Section (21 positions).

(e) Handled by State Department of Hospitals.

(f) Handled by Division of Milk and Dairy Products.

(g) Handled by Department of Livestock.

(h) Responsibility of Dept. of Agriculture.

(i) Program discontinued December 1975 by the State laboratory.

	3. Methods for Airborne Sulfate	2.8		86,000		
	4. Identification of Airborne Carcinogens	0.5	20,000			

*All of the above projects are performed with personnel time and funds contributed as time permits from the laboratory's service functions.

SECTION V

ORGANIZATIONAL CHANGES, SCREENING PROGRAMS, AND BRANCH LABORATORY INFORMATION

SECTION V

ORGANIZATIONAL CHANGES, SCREENING PROGRAMS, AND BRANCH LABORATORY INFORMATION

TABLE 5-1. STATES REPORTING CHANGES DURING THE REPORTING YEAR AFFECTING RELATIONSHIPS OF THE LABORATORY WITH OTHER UNITS OF GOVERNMENT.

STATE	REPORTED CHANGES
Mich.	As of July 1, 1975, the Bureau of Laboratories was combined with the Bureau of Community Health, containing the epidemiological services of the Department of Public Health, into the present Bureau of Disease Control and Laboratory Services. The Chief of the Bureau of Laboratories became Chief of the new Bureau and the position of Laboratory Director was created for the laboratory services, in parallel with a position of Disease Control Officer for the disease control activities. The laboratory activities under the Laboratory Director were organized into five programs, i.e., Laboratory Diagnosis, Antibiotic & Fermentation, Biologic Products, Crime Detection, and Laboratory Improvement.
Fla.	Reorganization of Department of Health and Rehabilitative Services was mandated by legislative action. Programs (including health) formerly supervised by eight divisions were decentralized to eleven districts. Public Health Laboratory Services will continue to be provided on a statewide basis through the existing system of a central and six branch laboratories under "Central Operations Services." It is anticipated that other laboratory functions will be relegated to this bureau in the near future as departmental reorganization progresses.
Tenn.	Administrative responsibility for the Toxicology laboratory system was transferred to the Division of Laboratory Services for fiscal year 1975-76. It is now (FY 77) under the management of the Tennessee Department of Safety.
