This publication is based on data voluntarily submitted to ASTPHLD by the nation's state and territorial public health laboratories. These data were processed, analyzed, and published by the Public Health Foundation through a subcontract under Cooperative Agreement No. U60/CCU303019 with the Centers for Disease Control. The content of this publication does not necessarily reflect the views or policies of the Department of Health and Human Services.

Thomas E. Maxson, Dr.P.H.  
Jesse Tucker, Ph.D.

## **FOREWORD**

The purpose of the Consolidated Annual Report (CAR) is to provide data to the members of the Association of State and Territorial Public Health Laboratory Directors (ASTPHLD) for planning and laboratory management purposes and to other health organizations and government agencies interested in public health laboratories.

The CAR is the only resource containing quantitative information about the various procedures conducted by Association members. The Management and Information Systems Committee of the Association, after considerable deliberation, intends to enhance the CAR, making it more meaningful, timely, and useful not only for Association members but also for users in other health organizations and government agencies. The Committee will ensure that the CAR remains a valued resource document.

Special thanks are due the state and territorial public health laboratory directors and their staff for their continued efforts in providing data for this report. We are also indebted to our Project Officer, Carl H. Blank, Dr.P.H., Centers for Disease Control, for his support and helpful comments. The assistance of these individuals has enabled us to present this comprehensive picture of our public health laboratories.

Suggestions or comments on this report are invited. Please address communications to the Association of State and Territorial Public Health Laboratory Directors, 1211 Connecticut Avenue, N.W., Suite 508, Washington, D.C. 20036.

Jon Counts, Dr.P.H.  
President  
Association of State and Territorial  
Public Health Laboratory Directors

## **INTRODUCTION**

This, the twenty-sixth edition of the Consolidated Annual Report (CAR), provides quantitative information about laboratory personnel and services identified in 15 workload areas. In addition to tabular displays, this year's CAR also includes graphic displays. The information for the tables and all but one of the graphics was provided by the Association of State and Territorial Public Health Laboratory Directors (ASTPHLD), consisting of the public health laboratories in each of the 50 states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. Information for the graphic on expenditures was collected by the Public Health Foundation in its annual survey of state health agencies.

The primary intent of the CAR is to aid Association members in planning, evaluating, budgeting, and effecting legislative activity at the state level. Principal users of this reporting system are State and Territorial Laboratory Directors, State and Territorial Health Officials, and the Centers for Disease Control.

Fifty-three of the 54 member laboratories provided data for this edition. The laboratory in New York did not report to the CAR for fiscal year 1990. National totals found in this edition, therefore, represent only 53 state and territorial public health laboratories.

The CAR deals with the personnel and workload activities of ASTPHLD. It omits those public health laboratory services provided by other state/territorial/local agencies. Therefore, this report understates the additional resources expended on public health laboratory services in nearly every state/territory having local health departments. If some type of activity is not reported in this CAR for a given Association member, it may indicate that a state or territorial agency other than the public health laboratory performs that service.

The basic unit of study in the Workload Reporting Section of the CAR is the laboratory specimen/sample. This is defined by ASTPHLD as any material received in the laboratory for testing in a workload category or subcategory or a material which is divided into aliquots for testing in multiple categories or subcategories and is counted as one specimen for each category or subcategory. Specimens collected from the same site on the same patient (or same environmental sample) at the same time, are counted as one specimen in each category or subcategory in which it is tested.

The types of procedures routinely used (those tests performed as a standard operating procedure on a specimen or sample) in Association laboratories are identified by category and subcategory in the 15 workload areas. The ASTPHLD provides workload data in this report only for those procedures routinely followed in their laboratories and excludes those procedures they are capable of performing but do not do on a routine basis.

The questionnaire for the FY 1990 CAR was composed of two sections: personnel and workload reporting. The personnel section requested the type and number of budgeted positions in five categories and defined these categories by turnover, vacancies, and workload area. All budgeted positions are defined in terms of full-time equivalent (FTE) or man-year equivalent because the standard work week differs among reporting laboratories in terms of number of hours worked. The workload reporting section requested specific data concerning routine laboratory procedures and the number of specimens/samples tested under each procedure.

**TABLE 8. BACTERIOLOGY-Other Bacteriology Specimens**

Lab & Region	Number of Specimens	Disease/Type of procedure
(1)	(2)	(3)
TOTAL	182,134	
AVERAGE	3,643	
NEW ENGLAND	4,962	
Connecticut	576	Genital smears-stain; nosocomial infections-phage typing; clinical cultures-FA, culture
Massachusetts	2,161	Legionnaires'-FA, cult., bioch.; Meningococcal-typing, H. influenzae typing, S. pneumoniae typing-Quellung Reaction, biochemical, gram stain
Maine	211	Campylobacter, miscellaneous reference-CDC methodologies
New Hampshire	551	Urinary tract infection, wound infection, meningitis, septicemia-serogrouping, culture, smear, biochemicals
Rhode Island	645	Septicemia, meningitis, wounds-culture, biochemicals
Vermont	618	Legionellosis-culture, DFA
MIDDLE ATLANTIC	716	
New Jersey	158	Streptococci, gram-negative and gram-positive bacilli-conventional biochemicals
New York*		
Pennsylvania	558	Legionellosis-culture, biochemicals, FA; botulism-mouse neutralization; Lyme disease-culture
EAST NORTH CENTRAL	27,436	
Illinois	125	Staphylococcus aureus, Bacillus cereus-culture, biochemicals
Indiana	1,079	Identification-biochemicals, GLC, Staphylococcus phage typing-plating; Legionella-plating, IFA, GLC
Michigan	10,446	Pseudomembranous colitis-cell cytotoxicity/neutralization; toxic shock-reverse passive latex agglutination;
		Legionellosis-culture, FA; food poisoning-culture
Ohio	5,821	Ureaplasma-culture; Legionnaires'-culture, FA
Wisconsin	9,965	Legionellosis, Legionella infection-culture, DFA; Lyme, Brucella, Tularemia, bones for transplant-culture; toxic shock syndrome, botulism-culture, toxin testing; Septicemia coccarditis-antibiotic dilution sensitivities; actinomycosis-culture, FA; Septicemia-serum bactericidal test, blood cultures; C. difficile-latex, toxin B, culture; miscellaneous cultures-culture, sensitivities; miscellaneous serogrouping-serogrouping, lansfield
WEST NORTH CENTRAL	6,301	
Iowa	2,373	Lyme disease-culture, FA; Leptospira-culture; botulism-toxin assay
Kansas	849	Legionellosis-culture
Minnesota	37	Legionella-culture, FA; Clostridia botulinum-culture, animal toxicity tests
Missouri	2,338	B. pertussis, F. tularensis-culture, biochemical ID, DFA; N. meningitidis-culture, serogrouping; H. influenzae-culture, serotyping; Legionnaires-culture, FA; Diphtheria-culture, confirmatory sugars; Pertussis-culture, FA, biochemicals; all others-culture
Nebraska	181	Hospital specimens-subculture, identification
North Dakota	262	Miscellaneous-isolation, identification; MIC's-autoscan IV
South Dakota	261	Pulmonary, wound, urinary, eye/ear-culture, biochemical, gram stain
SOUTH ATLANTIC	77,643	
Delaware	3,844	Urine-culture, sensitivity
District of Columbia	11,391	Urinary infection, wound-culture, biochemical, susceptibility
Florida	5,092	Eye/ear/spinal fluid/blood/urine/other exudates & body fluids, reference culture-smear, culture; sensitivity testing-disk; Rheumatic fever prophylaxis-microbial inhibition
Georgia	5,164	Haemophilus ducreyi-gram stain; Group B Streptococcus-culture, lansfield grouping; Trichomonas, yeast-Sellers' stain; miscellaneous bacteria-gram stain, culture, biochemicals, GLC
Maryland	47,360	Food poisoning-culture, biochemicals, & animal injections; urinary tract infection-culture, counts, sensitivity; misc. body sites-culture, stain, biochemicals, sensitivity
North Carolina	1,551	Legionellosis-culture, FA, serology
South Carolina	3,058	Legionella, urinary tract infections, direct smears, drug susceptibility tests, zoo cultures-plating, biochemical, FA
Virginia	0	
West Virginia	183	Reference culture-identification, biochemical
EAST SOUTH CENTRAL	39,811	
Alabama	25,003	Urinary tract infection-isolation/identification by biochemicals, microscan
Kentucky	76	Miscellaneous culture-biochemical, coagulase, smear, serogrouping; Legionnaires disease-DFA
Mississippi	13,223	Misc. waters-primary & enrichment plating, biochemicals, serotyping, subculture, serogrouping; misc. cultures-plating, selective subculture, biochemicals; urine culture-plating, subculture, biochemicals, bacterial sensitivity testing
Tennessee	1,509	Misc. aerobic & Capnophilic-DFA, culture, clinics including fastidious organisms-gram smears, biochemicals, serotyping/serogrouping
WEST SOUTH CENTRAL	6,419	
Arkansas	225	Blood cultures, spinal fluid, Staphylococcus, misc.-gram stain, culture, biochemicals; Legionella-culture, serology
Louisiana	551	
Oklahoma	312	Blood/urine/wound/CSF isolates-conventional methodologies
Texas	5,331	
MOUNTAIN	3,593	
Arizona	247	Legionella, Yersinia-DFA-culture; Francisella tularensis-culture, gram stain, biochemical, serotyping; Leptospirosis-darkfield; Borrelia-blood smears
Colorado	255	H. influenzae-culture; food poisoning-Staphylococcus aureus toxin assay, Clostridia, perfringens toxin assay
Idaho	1,094	Urine culture-API, microscan; other cultures-King battery
Montana	660	Miscellaneous bacterial specimens-conventional biochemicals
Nevada	647	Various other pathogens-Culture, smear, biochemicals, sensitivities
New Mexico	425	Legionellosis, plague-DFA, culture
Utah	265	Pneumonia, Meningitis, Septicemia-culture, typing, biochemicals
Wyoming	0	
PACIFIC	12,682	
Alaska	236	Reference cultures-microscopic, biochemicals, subculture
California	6,604	Plague-direct/conc. smear, culture, direct/indirect drug susceptibility, biochemicals, species ID, genetic probes; Legionnaire's-culture, FA; relapsing fever-animals, culture; miscellaneous-culture
Hawaii	2,695	Leptospirosis-culture, darkfield; Streptococcal-culture
Oregon	143	N. meningitis, H. influenzae-culture, typing; botulism-culture, animal inoculation; environmental cultures-plate count; food outbreaks-culture
Washington	3,004	Botulism-biochemicals, mouse neutralization; plague, Tularemia-FA, biochemicals; Brucellosis-biochemicals; Legionella-culture, FA; relapsing fever-darkfield; Lyme-EIA; Yersinia-biochemicals, FAME; T. pallidum-FA
TERRITORIES	2,571	
Guam	1,892	Trichomonas, Monika-Hansen MI BI
Puerto Rico	679	Urinary tract infection, sputum, miscellaneous-plating, biochemical
Virgin Islands	0	

\* New York did not report for fiscal year 1990.

TABLE 8. BACTERIOLOGY-Other Bacteriology Specimens (continued)

Lab & Region (4)	Reference culture/Type of procedure (5)
NEW ENGLAND	
Connecticut	
Massachusetts	Identification of gram positive/negative bacteria- conventional procedures using CDC protocols (no rapid methods or kits used)
Maine	
New Hampshire	Clinical sample isolates-culture, serogrouping, biochemicals
Rhode Island	Miscellaneous-culture, biochemicals
Vermont	Respiratory, CNS, wound, miscellaneous-standard bacteriology procedures
MIDDLE ATLANTIC	
New Jersey	
New York*	
Pennsylvania	Miscellaneous bacterial culture-gram stain, biochemicals, serogrouping, serotyping
EAST NORTH CENTRAL	
Illinois	N. meningitidis, H. influenza-serogrouping, conventional tests; aerobic actinomycetes, anaerobic organisms-conventional biochemicals; B. pertussis-conventional biochemicals, DFA; aerobic nonenteric organisms-conventional tests, biochemicals, S. aureus isolates-phage typing, Legionella pneumophila, enteric isolates-DFA, conventional tests
Indiana	
Michigan	Reference culture identification of aerobic bacteria-culture, biochemicals, GLC; molecular biology-plasmid analysis, GLC; urine cultures-conventional techniques; Staphylococcus phage typing-plate lysis
Ohio	Staphylococcus, aerobic-culture
Wisconsin	Aerobes, facultative, and anaerobes-conventional CDC & VPI methods
WEST NORTH CENTRAL	
Iowa	Miscellaneous gram negative and gram positive, proficiency specimens-biochemical, gram stain
Kansas	Reference bacteria, miscellaneous-conventional
Minnesota	
Missouri	
Nebraska	
North Dakota	Miscellaneous-isolation, identification
South Dakota	Miscellaneous reference cultures-gram stain, plating, subculture, biochemical
SOUTH ATLANTIC	
Delaware	Reference culture, identification; miscellaneous-culture, identification, sensitivity
District of Columbia	
Florida	
Georgia	
Maryland	Phage typing-phage plating; Streptococcus group-precipitin test; reference cultures-culture, biochemicals, serology
North Carolina	Streptococcus/Staphylococcus-smear, culture, biochemicals, serology; Campylobacter-smear, culture, biochemicals, drug susceptibility; miscellaneous-smear, culture, biochemicals
South Carolina	Miscellaneous referred isolates-biochemicals, serology; FA, GLC, Typhoid, Cholera isolate
Virginia	
West Virginia	
EAST SOUTH CENTRAL	
Alabama	
Kentucky	
Mississippi	
Tennessee	Haemophilus, Listeria, Francisella, Legionella, Brucella, Neisseria, misc. gram positive/negative microorganisms-culture, gram smear, biochemicals, serotyping, serogrouping
WEST SOUTH CENTRAL	
Arkansas	
Louisiana	Identification of gram negative rods-conventional biochemicals, King Weaver; identification of gram positive rods-conventional biochemicals, Hollis Weaver schema, non-beta hemolytic streptococci-conventional biochemicals
Oklahoma	Miscellaneous referred isolates-conventional
Texas	Enteric-biochemical, serological; miscellaneous-biochemical, serological, GLC
MOUNTAIN	
Arizona	H. influenza, N. meningitis, gram positive cocci & bacilli-culture, gram stain, biochemicals
Colorado	Neisseria meningitis-serotyping; gram positive/negative bacilli, gram positive cocci-identification
Idaho	Reference cultures-API, microscan, King battery
Montana	
Nevada	Various other pathogens- Smear, culture, biochemicals, sensitivities
New Mexico	Gram negative rods, gram positive rods-biochemical
Utah	Enteric pathogens-biochemicals, typing; Legionella-culture, FA; other organisms for identification-culture, biochemicals, typing
Wyoming	
PACIFIC	
Alaska	N. Meningitidis-culture, biochemicals, serogrouping H. influenza-culture, biochemicals, serotyping; S. pneumoniae-culture, bioch., oxidase, beta lactamase, Penicillinase, genetic probe; aerobic bacterial infection-gram stains, primary cult., bioch., coagulase, serogrouping
California	Mycobacteriology & enteric bacteriology-direct & conc. smear, culture, direct & indirect susceptibility, biochemicals, species ID, genetic probes; aerobic/anaerobic bacteriology-species ID
Hawaii	Miscellaneous-culture
Oregon	Gram positive/negative organisms-culture, biochemicals; misc. organisms for staining-gram/FA stains
Washington	Gram negative/positive rods, gram negative/positive cocci-biochemicals, FAME
TERRITORIES	
Guam	Cervical culture-culture; ear, wound culture-biochemical; urine cultures-culture, colony count
Puerto Rico	
Virgin Islands	

\* New York did not report for fiscal year 1990.

**TABLE 64. LABORATORY IMPROVEMENT PROGRAM-Other LIP Activities for All Types of Laboratories**

Lab & Region (1)	Program Activity (2)
Arizona	Blood alcohol program-prepare, distribute, and follow-up blood alcohol proficiency specimens; license lab personnel to analyze blood for alcohol content; issue permits to officers to operate blood alcohol testing devices
California	Licenses/grants permits/approves newborn screening labs, prenatal screening labs, cholinesterase labs, forensic alcohol labs, methadone labs and environmental labs
Connecticut	NPDES; asbestos in air and water (33 labs in state, 36 out-of-state labs); air testing labs, radon labs (69 in and out of state); recombinant DNA labs
Kansas	Admin. of state wide breath alcohol program: 210 agencies utilizing instruments in 122 sites-certify 150 instruments & approximately 2400 operators; conduct quarterly proficiency test program for certifying operators; provide court testimony in DUI cases; provide limited training to officers of judicial system
Louisiana	State Health Unit provides QA/QC training and proficiency testing
Maine	Consultations with Medicaid; certify out-of-state water labs by reciprocity; continuing education/training for clinical environmental lab personnel.
Maryland	Cytology proficiency testing program
Minnesota	Drug and alcohol laboratory licensure and inspection
Montana	National laboratory training network-attend yearly meeting, conduct monthly conference calls, coordinate training activities;
	Autoclave efficacy program-supply spore strips to labs by request, strip returned to state public health lab for testing after autoclaving
New Jersey	The Clinical Lab Improvement Service is responsible for the licensing, inspection, and proficiency testing of 134 blood banks.
North Carolina	Quarterly newsletter, audio-visual training material, distribution of bacterial stock cultures
North Dakota	NLTA-Midwestern ALTA, Laboratory Education for North Dakota (LEND), ND HIV/AIDS update, pH certification school for NPDES permittees, in-house seminars
Oklahoma	HIV Licensure
Tennessee	Microbiological training program: 1-Lab training for certification of waivered tests for county health dept. personnel. 2-Program prepares B.S. graduate
	microbiological students for state licensure. 3-Program serves as 4th academic year of education for B.S. degree in clinical microbiology, the purpose of which is to
	and prepare students for state licensure.
Utah	Pulmonary testing lab- a voluntary program which includes on site visits, proficiency testing monitoring and consultation;
	blood alcohol testing includes on-site visits, proficiency testing monitoring, and consultation
Virginia	Inspect and recommend approval/disapproval of four commercial blood banks.
Wisconsin	The Wisconsin State Lab of Hygiene (WSLH) provides LIPs (prof. testing) to other states. Out-of-state customers include lab physicians'
	offices and water chemistry labs. The WSLH is HCFA approved as provider of proficiency testing. Water chemistry labs are inspected/licensed by the Office of
	Technical Services, WI Dept. of Natural Resources

NOTE: Laboratories that did not report information for this table are not listed.

**TABLE 65. BIOLOGICS, REAGENTS, AND MEDIA PRODUCTION-Production of Biologics, Reagents, and Media for Distribution**

Lab & Region	No. FTE'S	Biologics		Reagents	Media	Materials Produced for Distribution
		Human Use	Lab Use			(7)
(1)	(2)	(3)	(4)	(5)	(6)	
TOTAL	167.55	1	6	16	18	
Alabama	3.60			X	X	Jones Kendrick media, Rodac plates, Modified Thayer Martin plates, collection bottles: glycerine saline, intestinal parasites, TB, public & private water, and milk, Cary Blair transport media
Alaska	0.70			X	X	Standard bacteriology media, reagents for indol, MRVP, nitrate testing, gram stain reagents
Arizona	6.00			X	X	Blood agar & heart infusion plates, agars: phenylethylalcohol, Mueller Hinton, chocolate, MacConkey's, Hektoen enteric, urea, M-1c, K-1s, M-endo, Haemophilus ducreyi, anaerobic Brucella, nutrient, campylobacter blood; chopped meat medium, broths: gram negative, tryptic soy, thioglycollate; reagents: nitrate, Kovack's; sputum KOH, Hanks; indole motility, triple sugar iron, ferric chloride, polyvinyl alcohol, buffered glycerol, saline, Cary Blair transport, Regan Lowe transport, buffer rinse water, API saline blanks, formalin, Simmons citrate, bile esculin
						10% sodium deoxycholate, 50% nitric acid, 50% sulfuric acid
Arkansas	3.00			X	X	Martin-Lewis, gram stain reagents
California	0.25		X	X		Anti influenza A H1N1 monoclonal Ab, anti influenza A H,N, monoclonal Ab
Colorado	2.00					All media for ova parasite, enteric, pertussis, and gonorrhea collection kits; nutrient agar, malt extract agar plates
Connecticut	0.50		X			VDRL antigen and saline, serum controls for Syphilis and Lyme disease
Florida	4.00				X	Lowenstein, Jensen Media used in TB testing
Hawaii	0.50				X	Transport media, specialized media, EMJH
Illinois	5.00			X	X	
Indiana	4.00			X	X	
Iowa	2.00			X	X	Buffers, specimen preservation & transport media, all bacteriological culture media used except Jembec plates
Kansas	2.00			X	X	
Kentucky	0.50				X	Lowenstein-Jensen media distributed to Louisville & Jefferson County Health Depts.
Massachusetts	7.00		X	X	X	172,508 tubes-culture media, 16,665 bulk containers-buffers and/or reagents, 67,274 microbiological agar plates
Michigan	100.00	X		X	X	DPT vaccine, individual vaccines for Diphtheria, Pertussis, Tetanus, tissue culture rabies vaccine, factor VIII, immune serum globulin, albumin, Salmonella & Legionella conjugated antisera, various media
Montana	NA					Stock cultures for media quality control
Nebraska	0.50			X		
New Mexico	3.00		X	X	X	Gram stain reagents, Mediums: Modified Martin Lewis, Cary Blair, Viral transport, Aimes transport; casamino acids, charcoal agar, Pai slants, PVA, neutral formalin, saline solutions, water & milk bottles
North Carolina						
North Dakota	1.00		X	X	X	Modified Thayer Martin, Jembec, Aimes transport media, Sabouraud's agar, Joes-Kendrick agar, PM-indicator agar, phosphate buffered saline, 5 percent buffered formalin, Rodac plates
Ohio	2.50			X	X	Viral transport media, Plates: Martin-Lewis agar, chocolate agar; Cary-Blair & throat swab medium, Alsever's & ACD, Regan-Lowe media tubes/plates
Pennsylvania	1.00					Enteric bacteriology kits, parasitology kits, throat washing kits, lyophilized bacteria for QC
South Dakota	2.00				X	Thayer Martin, Regan-Lowe
Tennessee	15.00		X			Isoultalex, VCAT, plates: Butzler, Gonopak, Martin-Lewis, sheep blood agar (for Haemophilus ducreyi); PAI agar & trypticase soy agar slants; Pertussis kits (agar); Group A Stpt. conjugate, Cary-Blair, formalinized kits, brain heart infusion and tryptose phosphate broths, mouse brain tissue, water collection bottles with preservative
Washington	1.50			X	X

TABLE 68. RESEARCH AND DEVELOPMENT-Technical Research

Lab & Region (1)	Titles of Research Projects (2)	Funding Support				
		Number of Positions (3)	Federal		State Funds (6)	Other Funds (7)
			Grants (4)	Contracts (5)		
TOTAL		14.7	0	168,838	395,400	13,058
Alaska	Comparative study of Gene probe vs. standard testing for gonorrhea and chlamydia	0.50			20,000	
California	Method development and validation for hazardous waste analysis	3.00			250,000	
	NCI-California collaborative studies	4.00			162,838	
Colorado	Enhancement of UST extractions	0.30			NA	
	SYVA software evaluation (Chlamydia)	NA				2,000
	Chlamydia EIA confirmatory assay	NA				500
Connecticut	CMV antibody in transfused neonates	0.00	0	0	0	0
	Evaluation of Toxoplasma kits: Abbott IgG, Abbott IgM, Sigma IgG	0.00	0	0	0	0
	Evaluation of Abbott Rubella kit	0.00	0	0	0	0
	Comparison of photovac & headspace techniques in detecting petroleum contaminants in ground water	0.00	0	0	0	0
Maryland	Methods improvement in Chlamydia detection	1.00				7,558
Michigan	Screening of drinking water samples for EPA contaminants using Ion Trap Detectors	NA			NA	
Ohio	Herpes evaluation, Ortho diagnostics	0.50				NA
	Herpes evaluation, diagnostic hybrids	0.50				NA
South Carolina	Multiple product evaluations	NA				NA
Washington	Development of TC-99 radiochemistry procedure	0.30		6,000		
	Radon in water samples	0.20			5,000	
Wisconsin	DIFCO EIA study	0.00				2,000
	MMR study	0.00				1,000
	Lyme, IgG, IgM, ELISA	0.20			23,200	
	Lyme Western Blot	0.20			21,000	
	G. C. probe evaluation	0.10			20,000	
	Clostridium difficile evaluation	0.10			11,000	
	Giardia, ELISA	0.10			5,400	
	CDC Lyme evaluation	0.20			10,000	
	Lyme tick evaluation	0.00			4,800	
	Borrelia culture	0.00			10,000	
	Methodology development Milwaukee	0.50			15,000	
	Blood lead proficiency testing	1.50			NA	
	Erythrocyte protoporphyrin	1.50			NA	

NOTE: Laboratories that did not report information for this table are not listed.

NA = Data not available.

\* New York did not report for fiscal year 1990.

\*\* Personnel are included in entry of column number.

NOTE: NA = Data not available.

## **NOTES AND DEFINITIONS**

Every attempt has been made to ensure the accuracy of the raw data which are included in this report. However, because of the various accounting practices employed, great diversity exists among Association laboratories. Therefore, the reader is advised to exercise great care in making comparative analyses without first consulting the laboratory director involved.

An "average," in a table, is the total divided by the number of participating laboratories reporting activity in a given category or subcategory.

### **SYMBOLS**

The data display format conforms to that of previous CAR reports. The following matrix identifies the symbols found in this edition.

<b>Symbol</b>	<b>Meaning and Purpose</b>
Blank or 0	A report with no activity for that particular item
X	A positive response
NA	The laboratory reported that data were not available.

### **THE FOLLOWING DEFINITIONS APPLY TO TABLES 1 THROUGH 60:**

#### **Workload**

Workload is reported by the number of specimens/samples in each category or subcategory. Workload includes procedures routinely followed in the laboratory. It does not include those procedures that the laboratory has the capability of performing but does not do on a routine basis. Routine tests are those tests performed as part of a standard operating procedure on a specimen or sample.

#### **Specimen/Sample**

Any material received in the laboratory for testing in a workload category or subcategory or a material which is divided into aliquots for testing in multiple categories or subcategories is counted as one specimen for each category or subcategory. Specimens collected from the same site on the same patient (or same environmental source) at the same time are to be counted as one specimen in each category or subcategory in which it is tested. The term "specimen" indicates an animal or human source, while "sample" indicates an environmental source.
