Oregon State Public Health Laboratory

Protecting the public's health since 1903

Because of us...

...every day, OSPHL lab professionals provide critical information that saves lives and prevents diseases for thousands of people.

OREGON STATE PUBLIC HEALTH LABORATORY

OUR MISSION: To provide and assure quality laboratory services throughout Oregon

THE PEOPLE BEHIND THE RESULTS

The Oregon State Public Health Laboratory's (OSPHL) state-of-the-art facility and expert staff deliver critically important services throughout Oregon and the Western region.

BECAUSE OF US,

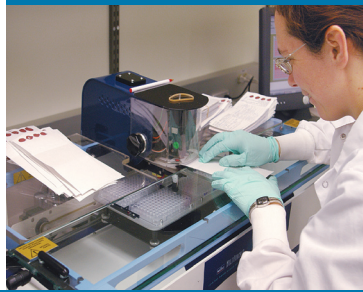

hundreds of norovirus outbreaks are detected and thousands of cases prevented.

We test for infectious diseases.

BECAUSE OF US,

millions of babies in six states will live healthy lives.

We test newborn babies for more than 40 disorders.

BECAUSE OF US,

the spread of HIV, STIs and hepatitis is prevented.

We identify transmissible infections.

BECAUSE OF US,

patients can trust their medical lab test results.

We assure laboratory quality.

BECAUSE OF US,

highly hazardous microbes and toxins are detected and identified.

We respond to emergencies and threats.

CRITICAL WORK AT A GLANCE

The work of the Oregon State Public Health Laboratory affects every Oregonian and includes:

- Conducting 6 million tests on 450,000 samples per year;
- Testing 1,400 babies daily;
- Assuring quality testing in 2,200 clinical and environmental laboratories;
- Serving more than 3,500 clinics, hospitals and health departments in six states;
- Performing 2,400 TB tests, 24,000 HIV tests, 12,000 hepatitis tests and 70,000 sexually transmissible infection tests per year.
