

No time to attend training?

The Electronic BT Workshop is always open!

When you attend our free, Electronic BT Workshop, you safely “work” with 10 unknown organisms, any of which could be a potential agent of bioterrorism.

Designed to reflect the training offered at our hands-on “Wet Workshops,” the Electronic BT Workshop helps build an understanding of the steps involved in the critical process of ruling out potential agents of bioterrorism. The interactive course includes:

- Selection process for appropriate rule-out tests;
- Ruling out suspected BT agents based on laboratory findings;
- Determining when to send isolates to your state public health laboratory;

Michael Pentella, Ph.D., Hygienic Laboratory associate director of infectious diseases, provides specific information about each BT agent in a series of videos.

The University Hygienic Laboratory in collaboration with the University of Iowa College of Public Health presents the Electronic BT Workshop on the Prepare Iowa website (www.prepareiowa.com).

After registering, follow the link to the course catalog and then search for the Electronic BT Workshop.
